YERICK CANO GARCIA

Software Engineer

+50687571891 • yerickcanogarcia@gmail.com • www.yerick.dev • Costa Rica, San José

Summary

AI-driven Frontend Software Engineer with expertise in React, TypeScript, and Next.js. Experienced in building performant web and desktop applications, integrating APIs, and optimizing user interfaces. Skilled in leveraging AI-assisted development tools to accelerate delivery, streamline testing, and improve workflows. Strong background with SQL-based databases (Snowflake, SQL Server) and familiarity with Postgres.

Experience

Snowflake Inc
Software Engineer   02/2023 - 07/2025

- Built and maintained React-based desktop applications with a focus on user experience and performance
- Leveraged AI-assisted coding and testing tools to accelerate development, streamline debugging, and improve feature delivery speed
- Integrated frontend apps with APIs and backend services, ensuring reliable and scalable data interaction
- Worked with Azure DevOps pipelines to track pull request validations, test outcomes, and build workflows
- Collaborated in Agile teams with designers, analysts, and product owners to deliver user-facing features on time

Mobilize.Net
Software Engineer   07/2022 - 02/2023

- Implemented frontend features in React, Next.js, and TypeScript for a web platform
- Collaborated with cross-functional teams to integrate backend services and databases
- Improved deployment pipelines, enhancing product reliability and reducing release friction
- Enhanced UI components and optimized workflows to improve maintainability and scalability

Education

Costa Rica Institute of Technology   02/2017 - 09/2022
Bachelor's Degree in Software Engineering

- Active as a professor assistant and class assistant
